

### What is DNA proDOC Fully Customizable High Security Paper?

DNA proDOC is the latest proprietary anti-counterfeiting solution from DNA Protected.

It is loaded with numerous high-end security features with additional anti photo copy and scan proof properties.

It's flexible design features allow for fully customizable options even for low volumes. It is comparable to CBS paper but at considerably lower prices.

#### Fully Customizable Cover Features

- Artificial custom or generic watermark in wallpaper design or in perfect register on both sides. Watermark visible by conventional means and also with a black light
- Custom or generic design coin reactive feature
- Chemical reactive – acetone and bleach
- Chemical reactive – test the paper with a special marker; a pink trace will appear. Erase it with a special eraser. These markers and erasers will not work on any other paper
- EXCLUSIVE and PROPRIETARY – The full area of the paper contains custom or generic invisible micro-text or micro-graphics (or a combination of both). It is only revealed by a special and relatively low-cost lens
- EXCLUSIVE and PROPRIETARY – Write your signature onto the paper with any water-based ink. By using the lens' the invisible micro-text or micro-graphics (or a combination of both) can be seen through the lens

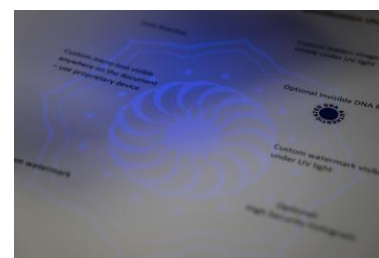

#### Fully Customizable Optional Features

- High security patented holographic images and features – stripes, patches, threads and planchettes
- DNA PROsmartMARK™ - our patented synthetic DNA strands
- Variety of embedded security fibers
- Variety of embedded security holographic and coded microDOT
- Full online authentication via our DNA smartDOC or DNA ProMAX mobile device verification system

#### Advantages:

- Fully bespoke design security paper not available anywhere else
- Same as white CBS 95gsm paper, but with unsurpassed anti-counterfeit properties and protection
- Available also as standard white copy paper (70 – 220gsm)
- Printable using flexo, offset, litho, intaglio, screen, inkjet, thermal and laser printers – we can also print it for you
- Instant, real-time mobile device authentication (optional)
- Available in a range of blank pre-cut security labels (rolls or sheets)
- Photocopied or scanned? Sure, but all features will be lost
- Uses? – Any security document from letterheads to high security cheques, visas and passports

## Regula Forensics Compact Verification Tool

Regula compact devices are intended for express authenticity verification and advanced examination of passports, ID cards, travel documents, visa stamps and seals, including but not limited to entry permits, banknotes, driving licenses, vehicle registration certificates and other vehicle related documents, signatures and handwriting fragments, revenue and special stamps, securities and other documents with security features.

The devices enable to detect main security features in printing, compare sizes of objects, control the width of typographic lines, detect mechanical and chemical alterations in document structure, examine documents in transmitted light.
